Dear Editor
NeuroQuantology Journal Present

We have read and used scientific articles published in NeuroQuantology Journal.

The performance of the NeuroQuantology Journal was excellent, and the published article helped us conduct research and write scientific papers.

I am Oktavia Dewi, Lecturer from Universitas Hang Tuah Pekanbaru, Indonesia

We have completed a scientific article entitled "**Factors Affecting Stunting Incidence In Toddlers (12-59 Months) at Rumbai Bukit Health Center Pekanbaru City.**"

We hope this article can be published in the NeuroQuantology Journal because there are interesting findings in the scientific paper that can become new treasures in science, especially in health.

We are willing to go through the review process following NeuroQuantology Journal standards.

Best Regards,

Oktavia Dewi
Universitas Hang Tuah Pekanbaru, Indonesia

Dear
Oktavia Dewi et. al
Universitas Hang Tuah Pekanbaru, Indonesia

Thank you for submitting your team manuscript to NeuroQuantology.

We have completed our evaluation, and the reviewers recommend reconsidering your team manuscript following minor revision. Please resubmit your revised team manuscript by March 25, 2022, or ask whether an alternate date would be acceptable. We invite you to send it back after addressing the comments below.

When revising your team manuscript, consider carefully all issues mentioned in the reviewers' comments: outline every change made in response to their comments and provide suitable explanations for any remarks not addressed. Please also note that the revised submission may need to be re-reviewed.

To submit your revised team manuscript, please log in as an author(s) at this email, and navigate to the "Revision" folder.

NeuroQuantology values your team contribution, and I look forward to receiving your revised team manuscript.

Editor and Reviewer comments:

Reviewer #1:

1. The paper has some interesting information, and the topic is essential; however, there seem to be some basic questions suggesting flaws in the questionnaire, which put the conclusions in question.
2. The English in parts approaches is incomprehensible, so as a first step, a firm editorial hand would be needed to figure out what needs to be rethought.
3. The literature review refers to engaging experience and studies elsewhere, but it is not well linked to the research and, therefore, the conclusions.
4. The paper focuses more on Indonesia Only. How about other countries and the questionnaire?.
5. There should be more information about the object of research, not about the content of the study.

I hope you can make improvements as soon as possible and send the revised article again via this email.

Kepada: Oktavia Dewi <oktavia.dewi@htp.ac.id>

Dear

Oktavia Dewi et. al

Universitas Hang Tuah Pekanbaru, Indonesia

Thank you for your team's efforts to improve your team article.

Based on the Reviewers' considerations, the article has, at some point, increased.

However, your team has to improve on a few more points. Hopefully, your team is willing to do it.

Please follow the following revision instructions:

#Reviewer 2:

1. I was hopeful that this article would be readily usable though the English in parts is so low that reading is challenging. The topic is of great importance.
2. The literature review includes some tantalizing references, but the links are not made to the specific study even after sorting through the language issues.
3. When study design comes into play, there are serious questions about the system.
4. It might be publishable if the Author could work with a robust English language editor or colleague to clean up both language and argument.
5. A side note is that it's not clear what the title references the article.

Articles that have been revised, please send them back via this email.
