 Subject: [JRC] Editor Decision
 2020-10-10
 Dear Authors,

28 We have decided on your submission to the Journal of Robotics and Control (JRC),
07:1
0
AM Our decision is: Accepted with Mayor Revision

The detail of the comment is as follow.

Comment of Editor:

>> The Title must fully describe the paper's content in short.

The Abstracts must contain at least 150 words up to 250 words, consist of 2-3 sentences as brief intro about the paper, 2-3 sentences to describe how the problem is solved, and 2-4 sentences showing the results of experiments/simulation, ended with 1-2 sentences as short main conclusions of the work.

The Introduction section must explain the background of the problem and the urgency of the study, which can be proved by providing some previous researches and works, and also how to solve the problem in brief. Also, the contribution and the importance of the research must be stated clearly.

The Method contains an explanation of the research method and the proposed method. This section can include research diagrams, system block diagrams, wiring diagrams and program flow diagrams.

The Results and Discussion section should provide a comparison to a similar method from previous works and researches.

The minimal References are 30 from an English Journal and using IEEE Style.

>> The Figure, Table and Equation are some of the most beneficial parts that will be seen first when reading a paper, hence it needs to be made easy to read and as best as possible.

The Image/Figure. It must be in PNG or JPG/JPEG format with 600-1200 dpi. Please don't crop, or use snipping and print-screens tools. Otherwise, the image resolution will be compromised.

The Tabel. Please use the Insert Table feature.

The Equation. Use the Insert Equation or Ms Equation. We suggest using 3 columns of the table to help, and then to make the equation on the middle of the column and the number of the equation on the right-side column.

All of Figure, Tabel, and Equation must be given by information, explanation and analysis, not only included without description.

>> Please use Grammarly to check your manuscript. The free Grammarly is enough for fixing some typo and grammar mistakes. The proofreading is recommended to increase the quality of the English language and writing.

>> The author must follow the template journal and the similarity must be under 20% or the manuscript will be rejected.

=====
=====

Title:Prototype or desain or implementation.

Abstract: This system or robot can work as expected, the system is capable of mapping based on the path that has been made. ? this sentence requires verification or is still a hypothesis.

Introduction: How to take references must be considered and reference is only 15

Some figure are unclear and unnecessary, add android application feature

Does the paper contain any original contribution to the field? yes, I am my original contribution from the field

Does the article have a good novelty and interesting topic? yes, the topic is not new but interesting

Does it have any contribution to knowledge?

should be designed in more detail for contributions, desain mechanics and others

Is the research question really an important one? This paper is a simulation prototype

Is the paper technically understandable and may likely to happen? Yes, can

Is the paper well written (clear, concise, and well organized)? clear, concise but not yet organized, check the title

In this paper, the application / implementation of robotics must be in accordance with the development of research, image descriptions, suitability of taking good titles and references will greatly determine the clarity and regularity of the content of the paper.

=====
=====

Comment of Reviewer 2:

>>

=====
=====

- Better description and explanation of results.
- The results and conclusion should be improved.
- The References should be updated (2017 to 2020).

=====
=====

Comment of Reviewer 3:

>>

=====
=====

Novelty of work: In view of the large developments in the area of present work, Expand

your work more.

The abstract is not convincing and is disorganized, it should be refined to precisely illustrate what authors have done in this paper within 200 words. The abstract must be a concise yet comprehensive reflection of what is in your paper.

The figures are not clear.

The manuscript isn't formatted correctly.

The English language of this paper too weak, please send the paper to the native speaker, there are several sentences which too poor.

The description of manuscript is very important for potential reader and other researchers. I encourage the authors to have their manuscript proof-edited by a native English speaker to enhance the level of paper presentation.

Many details are missing and others unclear.

How are the parameters in the proposed model selected?

There are no citations for many sentences in this manuscript. Why? Please check.

=====
=====

Comment of Reviewer 4:

>>

=====
=====

Title is too simple, too general, make the specific title.

the writing of sentences in the abstract is improved

In the Introduction part, the new features of the proposed method and the main advantages of the results over others should be clearly described.

the method section should be explained in terms of the method for determining liquid density, the relationship between liquid density and temperature

the method section should be explained in terms of the method for determining liquid density, the relationship between liquid density and temperature

Not yet seen a conclusion, the comparison of the results of research conducted

Added prior research related to reinforce the urgency of the research conducted

Many details are missing and others unclear.

References aren't formatted according to rules.

Some articles listed in References are old.

=====
=====

Comment of Reviewer 5:

>>

=====
=====

The paper makes a good effort and is suitable for publication

1-Novelty of work: In view of the large developments in the area of present work, Expand your work more.

2-In abstract, the result of this work must be described briefly with data.

3-In the Introduction part, the new features of the proposed method and the main

advantages of the results over others should be clearly described.

4-There are no citations for many sentences in this manuscript. Why? Please check.

5-The order of citations isn't convincing.

6-There are no citations for many sentences in this manuscript. Why? Please check.

7-The order of citations isn't convincing.

=====
=====

Please, revise your manuscript based on the editor and reviewer suggestion, advice and comment. Then, send your revision manuscript using our system journal.

Thank you,

Best Regards,
Yuliadi Erdani
JRC Editor.
