Muhardi Muhardi, Sakroni Indra Gunawan, Yuda Irawan, Yesica Devis:

We have reached a decision regarding your submission to Journal of Applied Engineering and Technological Science (JAETS), "Application Of Web Based Lms (Learning Management System) In Sma 1 Kampar Kiri Hilir".

Our decision is: Revisions Required

Reviewer A:

Abstract : Prepare your abstract in single paragraph and within 200 words (and min 150 words in length). You need to summarize your contribution, idea, findings/results, and describe implications of the findings. Without abbreviations, footnotes, or references. Without mathematical equations, diagram or tabular material. It is suggested to present your abstract included the elements: 1) state the primary objective of the paper; 2) highlight the merits (or contribution); 3) give a conceptual idea on the method; 4) describe the research design and procedures/processes employed (is it simulation, experimental, survey etc.); 5) give the main outcomes or results, and the conclusions that might be drawn; and 6) include any implications for further research or application/practice, if any

Introduction section : explain the context of the study and state the precise objective An Introduction should contain the following three parts: - Background: Authors have to make clear what the context is. Ideally, authors should give an idea of the state-of-the-art of the field the report is about. - The Problem: If there was no

Abstract : Prepare your abstract in single paragraph and within 200 words (and min 150 words in length). You need to summarize your contribution, idea, findings/results, and describe implications of the findings. Without abbreviations, footnotes, or references. Without mathematical equations, diagram or tabular material. It is suggested to present your abstract included the elements: 1) state the primary objective of the paper; 2) highlight the merits (or contribution); 3) give a conceptual idea on the method; 4) describe the research design and procedures/processes employed (is it simulation, experimental, survey etc.); 5) give the main outcomes or results, and the conclusions that might be drawn; and 6) include any implications for further research or application/practice, if any

Introduction section : explain the context of the study and state the precise objective An Introduction should contain the following three parts: - Background: Authors have to make clear what the context is. Ideally, authors should give an idea of the state-of-the art of the field the report is about. - The Problem: If there was no problem, there would be no reason for writing a manuscript, and definitely no reason for reading it. So, please tell readers why they should proceed reading. Experience shows that for this part a few lines are often sufficient. - The Proposed Solution: Now and only now! - authors may outline the contribution of the manuscript. Here authors have to make sure readers point out what are the novel aspects of authors work. Authors should place the paper in proper context by citing relevant papers. At least, 8 references (recently journal articles) are cited to support this section

Results and Discussion : The presentation of results should be simple and straightforward in style. This section reports the most important findings, including results analyses as appropriate and comparisons to other research results. This section should be supported suitable references.

Conclusion : Your conclusion should make your readers glad they read your paper. Summarize sentences the primary outcomes of the study in a paragraph (NOT in numbering).

References : Minimum 25 references primarily with a minimum of 60% to journal papers SCOPUS Q3. mandatory use of reference applications such as mendeley or similar applications. References must be cited in paragraphs. should not only be included without citation in the paragraph.

Recommendation: Revisions Required
