Dear sir/madam,
 Sorry in advance, I would like to ask about the status of my paper submission at **IJIM** with the title: Real Time System Monitoring and Analysis Based on Internet Of Things (IoT) Technology in Measuring Outdoor Air Quality which was sent on December 22, 2020.
 What is my next status paper?

Thank you sir/madam for your help.

Regards,
 Author

Dear Chief of Editor,

I hope this email finds you well.
Thank you for your email.
If you do not mind, please give me an extended time to revise my manuscript since I am still working to improve the content according to your critical comments. I will send the revised manuscript soon once it is completed.
I am looking forward to your response.

Thank you for your concern.

Best regards,
[Yuda Irawan]

Sebastian Schreiter

to me

Mon, May 3, 9:31 PM

Dear Dr. Irawan,

Previously, you have been informed that your paper 'Real Time System Monitoring and Analysis Based Internet Of Things (IoT) Technology in Measuring Outdoor Air Quality' has been accepted for publishing in the International Journal of Interactive Mobile Technologies (IJIM). Please find attached to this e-mail the invoice for your Article Processing Charges (APC). Payment is expected within 10 days from reception of this invoice on. Payment can be made by "bank transfer" or via "PayPal".

PayPal

If you choose to pay by PayPal, please use the link below to pay your invoice.

https://www.paypal.com/cgi-bin/webscr?cmd=_s-xclick&hosted_button_id=ZC6EXPN6ASE3Q

Bank Transfer

For payments via bank transfer please find the details in the attached invoice.

You will be notified as soon as we have received your payment. Also, once we have received 1) the payment AND 2) your final version, your paper will be scheduled for an issue. This schedule will be provisional and may still change. We very much appreciate that you don't ask for the publishing date before both of the above conditions are fulfilled.

Thank you for working with us!
Sebastian Schreiter

Yuda Irawan:

We have reached a decision regarding your submission to International Journal of Interactive Mobile Technologies (iJIM), "Real Time System Monitoring and Analysis Based Internet Of Things (IoT) Technology in Measuring Outdoor Air Quality".

Our decision is to: Resubmit for Review

Enclosed are your reviews. If you should choose to resubmit your paper, please prepare a new manuscript taking into account the reviewers' comments and make a new submission through iJIM editorial system at <http://online-journals.org/index.php/i-jim>

Sincerely,

Apostolos Gkamas

Subject: Real Time System Monitoring and Analysis Based Internet Of Things (IoT) Technology in Measuring Outdoor Air Quality [DELETE](#)

Dear Chief of Editor
International Journal of Interactive Mobile Technologies,

I hope this email finds you well. I have submitted the final documents and have added 3 citations from the IJIM journal.
I am very grateful about my acceptance of my paper to be published in the ijim journal.

Sorry in advance, can I submit an application so that my paper is published in May 2021? So that I can carry out a seminar on the results of the doctoral program in June, so that I don't add another 1 semester so I don't get charged the semester fee.

And I already have money and am willing to make payments related to APC when I get an invoice.

I really ask for the help of the IJIM team to help me.

Thank you.

With best regards,
Yuda Irawan

International Journal of Interactive Mobile Technologies

Close

Dear reviewers,

Thank you for giving me the opportunity to submit a revised draft of my manuscript titled **Design and Analysis of Internet of Things (IoT) Technology in Measuring Air Quality**. We appreciate the time and efforts that you have dedicated to providing your valuable feedback on our manuscript. We are grateful to the reviewers for their insightful comments on this manuscript. We have been able to incorporate changes to reflect most of the suggestions provided by the reviewers. We have highlighted the changes within the manuscript. Here is a point-by-point response to the reviewers' comments and concerns.

Response to reviewer I:

No	Comment	Response
1	The abstract has to be rewritten as it is not clear enough. It should be structured as thus: Background, objective, method, result or findings, and conclusion.	Thank you for pointing this out. We have revised the abstract as suggested. (page 1 line 12-26)
2	IoT and Internet of Things are the same thing and of the same meaning. IoT is the abbreviation for the Internet of Things. I will also suggest you remove the word web as it is not in the title or the abstract.	Thank you for pointing this out. We have deleted the keyword "IoT", but for the word "web", we want to keep this word as our new revised abstract has some of the word "web" on it. (page 1 line 27)
3	The second to the last paragraph should discuss the objective of the study and the last paragraph should present what is expected in the remaining sections of the article.	Thank you for pointing this out. <ol style="list-style-type: none">1. We have added a paragraph that explains the objective of the study (second to the last paragraph). (page 2 line 71-77)2. And We have added a paragraph that presents the paper structure (last paragraph). (page 2 line 78-82)
4	The related work is not adequate and there should be a section to present the motivation of the study.	Thank you for pointing this out. We have modified the related work as following: <ol style="list-style-type: none">1. We have added the limitations of previous works (page 3 line 112-118)2. We have added a paragraph which explain the contribution/motivation of this study (page 3 line 118-126)
5	Figure 7 should be discussed in the body of the manuscript.	Thank you for pointing this out. We rearrange the results order, so previously Figure 7 is now become

		Figure 11, and we mention Figure 11 in page 11 line 313.
6	This study performance should be compared with previous related works and this should also be discussed here.	Thank you for pointing this out. The comparison of this study to the previous study has been added in the analysis and discussion section. (page 14 line 385-400)
7	The references should be consistent and I will suggest the authors use the 7 th edition APA style if the journal doesn't have a particular reference format.	Thank you for pointing this out. The reference style has been edited using 7 th edition APA style. (page 15-16 line 431-494)
8	The authors should perform copy-editing on their article because there are lots of grammatical and punctuation errors.	Thank you for your input. We have tried to improve the language quality and revised the errors by checking it to the native proofreader.

Response to reviewer II

No	Comment	Response
1	The summary should be improved, it should explain the procedure and the type of tests performed in the measurement of air quality.	Thank you for pointing this out. We have revised the abstract as suggested. (page 1 line 12-26)
2	In the introduction part, it does not really focus on the problem and what the study proposal contributes to what exists up to now	Thank you for pointing this out. We have edited the introduction part, and we believe our modified paragraph is more focus on the problem and contribution. (page 1-2 line 28-82)
3	In section 2 (Related Works) you describe 5 studies but do not establish their limitations. If you present an alternative technology to government measurement systems, you must argue the advantages of your system against the rest	Thank you for pointing this out. We have modified the related work as following: <ol style="list-style-type: none"> 1. We have added the limitations of previous works (page 3 line 112-118) 2. We have added a paragraph which explain the contribution/motivation of this study (page 3 line 118-126)
4	You must further specify the data collection procedure, number of measurements, measurement times ...	Thank you for pointing this out. The research/measurement scenario has been added in the section 4. In this research we are using real time data collection and directly display the result in our IoT-based website. (page 8 line 237-256)
5	The discussion part is insufficient. It does not discuss the results in relation to previous studies and measurement systems	Thank you for pointing this out. The comparison of this study to the previous study has been added in the analysis and discussion section. We also have added the discussion related to the measurement systems. (page 14 line 385-400)
6	The conclusions must be justified based on the results	Thank you for pointing this out. We have modified the conclusions as your suggestion. (page 14-15 line 405-424)
7	Review and adequate the bibliographic references according to the citation style of the journal	Thank you for pointing this out. The reference style has been edited using 7 th edition APA style. (page 15-16 line 431-494)
